SOUND PRODUCTION

Our team brings over 10 years of experience to bear on every project, whether it's an audiobook, sound design for film or television, music production or a guided museum tour. We are forever stretching the boundaries of what audio can do, always looking (and listening) to the horizon for the next frontier to conquer. From original audio content like podcasts to immersive soundscapes for games and virtual reality, we have the imagination to dream it, the equipment to bring it to life, and the experience to produce it quickly and effectively.

PHOTOGRAPHY

Now what kind of video production company would we be if we didn't serve up some kickass photography skills? After all, photography is one of the basic building blocks of visual storytelling.

Someone great once quoted, "We keep this love in a photograph, we made these memories for ourselves, where our eyes are never closing, hearts are never broken, and time's forever frozen still." Okay, you got us - it's not a quote, it's a lyric from an Ed Sheeran song, but hey - it's pretty darn accurate!

Our Cinematic Psychos shutterbugs stop at nothing to get that perfect shot. Be it a product photoshoot or commercial photography, our signature storytelling obsession dribbles into our photos, making them all the more special!

With a total amount of creativity, we transform genuine events into memorable pictures that have the ability to captivate the viewer.
